

Product Information Tangut USA

Sea Berry Essence

Product Profile

SEA BERRY ESSENCE is rich in bioactive nutrients made from the natural Sea Buckthorn "superfruit", a native plant of the pollution-free Tibetan Plateau. It is clinically-proven to provide effective support for overall health, such as boosting immunity, protecting the mouth and stomach, and promoting healthy skin, hair and nails.

USDA Certified Organic Sea Buckthorn Seed Oil

190+ bioactive nutrients

Rich in Vitamins E, A, D & P

80% unsaturated fatty acid

18 amino acids, 28 trace elements

Omega, 3, 6, 7, and 9

High Superoxidase Dismutase (SOD)

1. Why choose Tangut Origin Sea Berry Essence?

A sea of ingredients: Sea Berry Essence represents the planet's most abundant source of nutrients, offering more than 190 types of vitally important healing and health-promoting vitamins, unsaturated fatty acids, and micro-elements. Famous for its healing and health-promoting properties, Sea Berry or Sea Buckthorn is known in China, Russia and Europe as one of nature's most incredible medicinal plants, often described as "the fruit of life" or "the perfect plant in the world."

Best choice of raw material: There are two sources of oil in Sea Berry: the seed and the pulp. In comparison with Sea berry pulp oil, the seed oils are highly unsaturated with up to 85% or more of the fatty acids making up the oil being linoleic or linolenic. Sea Berry seed oil is much more beneficial than pulp oil as it contains a significant amount of essential Polyunsaturated fatty acid (PUFA).

Excellent source: To control the quality of Sea Berry, we only select the sea berries from the Tibetan Plateau, which we have found to possess the highest proportion of molecular species as well as the best sensory quality and chemical composition among other sources.

Outstanding purity: 100% Concentrated Sea Berry provides an antioxidant boost and dietary support for our bodies to stay and feel healthy.

Stable: Our advanced super critical CO₂ extraction method prevents nutrients from being destroyed in the process and to maximize antioxidant activity of molecules in Sea Berry.

Easy to digest: Zero-reflux herbal formula for easier digestion.

2. How does Sea Berry Essence enhance our general health?

Sea Buckthorn berries are rich in essential healing and health-promoting vitamins, antioxidants, fatty acids, and other healing compounds. Listed below are some of its remarkable pharmacological values:

Immunity Enhancer, Antioxidant and Anti-aging: Modern medical science has shown that the body's aging process is directly related to the oxidation of its cells. Therefore, preventing oxidation and clearing the body from free radicals becomes the key to anti-aging.

Out of the more than 190 nutrients and bioactive substances Sea Buckthorn oil provides, many are considered immune building factors, such as linolenic acid, vitamins E, A, carotene, polyphenols, flavonoids and trace elements including iron, copper, manganese, selenium, etc. This group of well-coordinated and well-proportioned

Sea Berry Essence

factors regulates and maintains the immune system in different processes and at different levels, strengthens the body's natural defense, and helps natural healing. Sea Buckthorn oil is a pure natural antioxidant. Its rich content of flavonoids, glucosides, phenols, terpenes, vitamins E, A, C, β -carotene, and trace elements are all antioxidants with very low molecular weight to neutralize free radicals. They help activate superoxide dismutase whose role in the body is to eliminate free radicals and mutant and dead cells caused by free radicals, and increase phagocytosis of macrophage.

Gastrointestinal Health: The health promoting effects of Sea Buckthorn oil are direct and clear. The concerted and mutual promoting actions of the 190+ elements have positive effects on the endocrine, circulation, immune, and nervous systems and this in turn creates a most favorable condition for the digestive system.

The oil provides a protective coating inside the mouth, stomach, intestines and duodenum, thus protecting mucosa and its normal functions. The protective and soothing properties of β -sitosterol- β -D-glucosides, ursolic acid and betaine, promote natural healing. β -carotene, vitamin E, unsaturated fatty acids stimulate cell metabolism at site and help natural healing. Sea buckthorn oil has remarkable inhibiting effects on gastric acid and abnormal increase of gastric proteinase, thus keeping the digestive system healthy and ease constipation.

Skin Health: Free fatty acids, carbohydrates, phytosterol, phosphatide, vitamins E and A, carotenoids in Sea Buckthorn oil are organically combined together providing more protection and nutrition to the skin. The free fatty acids are easily absorbed by the skin, which helps keep it slightly acidic, and inhibits unhealthy microbes.

Linoleic acid (Omega 6), palmitoleic acid (Omega 7) and linolenic acid (Omega 3) promote healing of tissue damage, and the hydrocarbon prevents excessive moisture loss of the skin, softens and lubricates the skin and keeps it smooth and fair. Sitosterol improves microcirculation in the skin. Phosphatide forms a protective film to prevent moisture loss and keep invaders at bay, and acts both as a moisture regulator and an antioxidant against wrinkles. The miraculous properties of stimulation to tissue regeneration and epithelial natural healing without leaving scars make sea buckthorn oil a most welcome remedy for burn, cuts, frostbites, bed sores, wounds, etc.

3. Are the health benefits of Sea Berry Essence scientifically proven?

Medicinal uses of Sea Berry oil are well documented in Asia and Europe. Clinical tests on its medicinal uses were first initiated in Russia during the 1950s. Sea Berry oil was formally listed in the *Pharmacopoeia* in 1977, and clinically tested in Russia and China. Recently, numerous pharmacological effects are documented in the scientific literature, including antimicrobial, antiulcer genic, antioxidant, anticancer, radio protective activity, platelet aggregation, liver injury, cardiovascular risk factors, and effects on skin and mucosa.
