

# Product Information Tangut USA

## Memory Fortifier

## Product Profile

Memory Fortifier is a natural brain protector made from Cistanche Tubulosa, Goji and Ginkgo Biloba.

- Helps protect the brain from free radicals and age damage
- Stimulates mental clarity and aids in the reversal of memory loss
- Improves short-term memory scanning speed and long-term memory recall

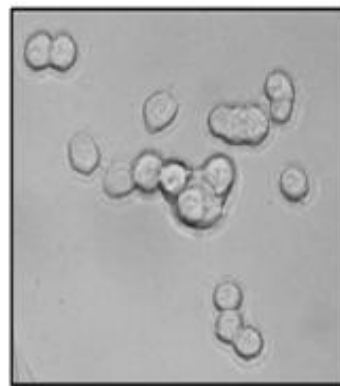

**Tangut USA** plants are grown and harvested on our own 2,000 acre farm in pollution-free Tibet. Our farm is located in the Qaidam Basin, Qinghai Province, a fairly unpopulated region with an average altitude of 9,000-10,000 ft. In this climate our plants grow ultra-clean, pure and strong. Through our special CO<sub>2</sub> extraction method, we ensure the quality of our botanic extracts, clinically-proven and USDA-certified. We are proud to claim that all our products are manufactured in the USA.

**Neuroprotective Effects of Cistanche.** Memory Fortifier (MMF) contains a blend of Cistanche, Goji and Ginkgo extracts whereas Cistanche is the main ingredient. The Cistanche extract enhances **learning and memory by inducing nerve growth factor (NGF)**.

**The beneficial** effects are seen in:

- Preventing neuronal death
- Promoting neurite outgrowth
- Supporting synapse formation
- Enhancing memory function

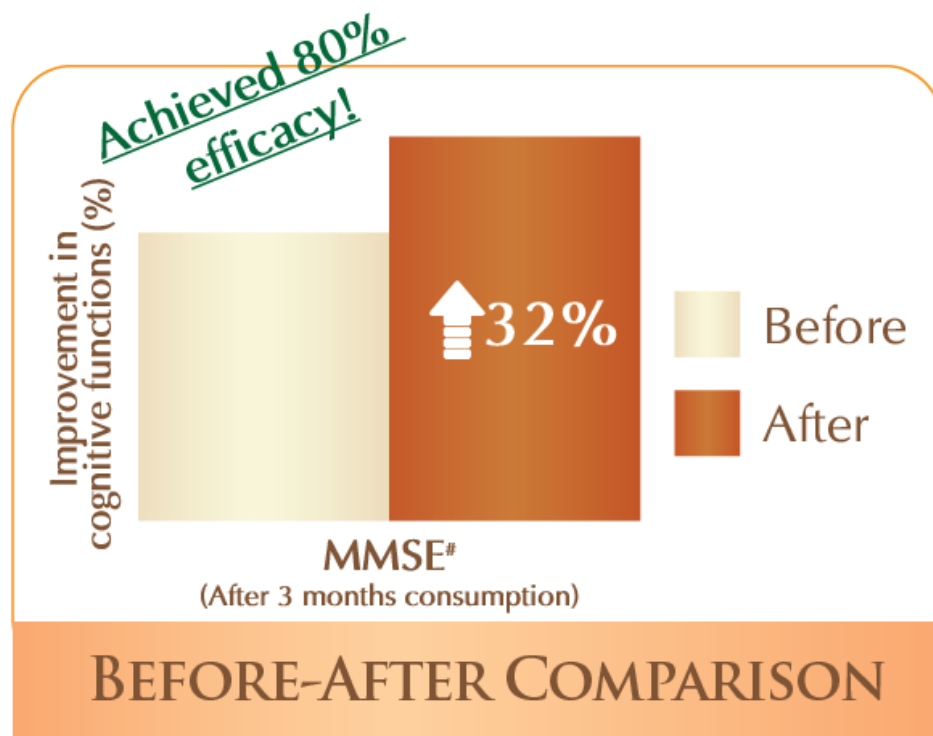

NGF and NGF-like molecules can potentially be used to treat neurodegenerative disorders, such as dementia. Cistanche extract significantly increases the NGF induction and neurite extension as shown in the picture.

Without MMF

With MMF: Clearly visible Neurite Growth and Enhanced Structure

#MMSE = The Mini-Mental State Exam that is globally accredited to test the cognitive functions.
